

Hi, I'm Kanish Kumar currently pursuing my degree in Information Technology and Engineering.

I am passionate about software development, artificial intelligence, and IoT-based applications. I have good knowledge of Python, C programming, Java, HTML concepts.

Recently, I worked on a project cyber security threats for online banking and online transactions, where I learned how to develop website and survive system. I have also practiced solving problems related to Artificial Intelligence techniques, Operating Systems, and Data Structures through academic projects and assignments.

In addition, I'm improving my practical skills by working on programming projects such as AI-based tools and web development applications. I enjoy learning new technologies and applying them to solve real-world problems.

I'm looking forward to gaining industry experience where I can improve my technical skills, contribute to innovative projects, and grow as a software developer and AI engineer.
